IMPORTANT: The projections or other information generated by the Your Retirement Outlook® tool regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results, and are not guarantees of future results. Moreover, even though the tool's estimates are statistically sound based upon the simulations it runs, the tool cannot foresee or account for every possible scenario that may negatively impact your financial situation and results may vary with each use and over time. Thus you should monitor your account regularly and base your investment decisions on your time horizon, risk tolerance, and personal financial situation, as well as on the information in the prospectuses for investments you consider.

Review the fees and expenses you pay, including any charges associated with transferring your account, to see if consolidating your accounts could help reduce your costs. Be sure to consider whether such a transfer changes any features or benefits that may be important to you.
